## SUBJECT INDEX / RÉPERTOIRE DES SUJETS<sup>1</sup>

### A. General

02. *Historical Aspects*  
 Dr. J. B. Auden Commemorative Volume (Symposium on the geological and engineering problems of river valley projects in India): Book Review. Legget, R. F., 92.
04. *Textbooks, Handbooks, and Geotechnical Periodicals*  
 Handbook on mechanical properties of rocks. Volume 1: Book Review. Herget, G., 93.  
 Permafrost terminology: Book Review. Slusarchuk, W. A., 182.  
 Foundation engineering handbook: Book Review. Tavenas, F. A., 182.  
 Retaining walls anchorages and sheet piling. Theory and practice. Volume 1: Book Review. Byrne, P. M., 187.  
 Phyllosilicates and clay minerals: a laboratory handbook for their x-ray diffraction analysis: Book Review. Haynes, J., 337.  
 Methods of geological engineering: Book Review. Grice, R. H., 498.  
 The Canadian manual on foundation engineering: Book Review. Golder, H. Q., 499.

### B. Engineering Geology

00. *General*  
*In situ* stress measurements in some near-surface rock formations—Thorold, Ontario. Palmer, J. H. L. and Lo, K. Y., 1.  
 Dr. J. B. Auden Commemorative Volume (Symposium on the geological and engineering problems of river valley projects in India): Book Review. Legget, R. F., 92.  
 La cartographie d'excavation en géologie urbaine—application à la région de Montréal. Durand, M., 243.  
 Cartographie géotechnique ville de Bécancour. Maranda, R., 251.  
 An approach to engineering geological investigations on the Island of Montreal. Grice, R. H., 397.
01. *Soil Formation*  
 A theory of soil sedimentation. McRoberts, E. C. and Nixon, J. F., 294.
03. *Mass Movements and Subsidence*  
 Major rock slides in the Rockies. Cruden, D. M., 8.
05. *Permafrost and Frozen Ground*  
 A design approach for pile foundations in permafrost. Nixon, J. F. and McRoberts, E. C., 40.  
 Use of the static penetration test in frozen soils. Ladanyi, B., 95.  
 Steady-state and quasi-static thermal results for bare and insulated pipes in permafrost. Thornton, D. E., 161.  
 Normal freezing and thawing degree-days from normal monthly temperatures. Boyd, D. W., 176.  
 Permafrost terminology: Book Review. Slusarchuk, W. A., 182.  
 Predictions and observations on the behaviour of a warm gas pipeline on permafrost. Hwang, C. T., 452.
10. *Mineralogy and Petrology*  
 Phyllosilicates and clay minerals: a laboratory handbook for their x-ray diffraction analysis: Book Review. Haynes, J., 337.

### C. Site Investigations

00. *General*  
 La cartographie d'excavation en géologie urbaine—application à la région de Montréal. Durand, M., 243.  
 Cartographie géotechnique ville de Bécancour. Maranda, R., 251.  
 An approach to engineering geological investigations on the Island of Montreal. Grice, R. H., 397.
03. *Probing (Soundings)*  
 Correlations between cone resistance and vane shear strength in some Scandinavian soft to medium stiff clays. Lunne, T., Eide, O., and de Ruiter, J., 430.

<sup>1</sup>Based on the International Geotechnical Classification System (IGC) approved in 1969 by the International Society for Soil Mechanics and Foundation Engineering. Permission to use this classification system is gratefully acknowledged.

07. *Measurements of Field Conditions (incl. groundwater, in situ stress)*  
*In situ* stress measurements in some near-surface rock formations—Thorold, Ontario. Palmer, J. H. L. and Lo, K. Y., 1.
08. *Field Testing (excl. tests for engineering properties)*  
 Testing of drivability of concrete piles and disturbance to sensitive clay. Fellenius, B. H. and Samson, L., 139.  
 Dynamic experiments with small pile foundations. Novak, M. and Grigg, R. F., 372.

#### **D. Soil Properties: Laboratory and Field Determinations**

00. *General (incl. laboratory supplies)*  
 Geotechnical aspects of coal waste embankments. Holubec, I., 27.  
 Predictions and observations on the behaviour of a warm gas pipeline on permafrost. Hwang, C. T., 452.
05. *Compressibility (incl. consolidation and swelling)*  
 Seepage control in tailings dams. Mittal, H. K. and Morgenstern, N. R., 277.  
 Density and compressibility characteristics of air-water mixtures. Fredlund, D. G., 386.
06. *Shear-deformation and Strength Properties (incl. pore-water pressure)*  
 Homogeneous triaxial tests on sand. Criterion for homogeneity and measurement of volume changes. Raju, V. S. and Deman, F., 85.  
 Use of the static penetration test in frozen soils. Ladanyi, B., 95.  
 The use of one-dimensional compression tests and elastic theory in predicting deformations of rockfill embankments. Charles, J. A., 189.  
 Constitutive relations for volume change in unsaturated soils. Fredlund, D. G. and Morgenstern, N. R., 261.  
 The strain hardening behaviour of particulate media. Frydman, S., 311.  
 Reanalysis of simple shear soil testing. Prevost, J.-H. and Høeg, K., 418.  
 Correlations between cone resistance and vane shear strength in some Scandinavian soft to medium stiff clays. Lunne, T., Eide, O., and de Ruiter, J., 430.
07. *Dynamic Properties*  
 A survey of the Canadian strong motion seismograph network. Rogers, G. C., 78.

#### **E. Analysis of Soil-engineering Problems**

00. *General*  
 Constitutive relations for volume change in unsaturated soils. Fredlund, D. G. and Morgenstern, N. R., 261.  
 A theory of soil sedimentation. McRoberts, E. C. and Nixon, J. F., 294.
02. *Deformation and Settlement Problems*  
 A design approach for pile foundations in permafrost. Nixon, J. F. and McRoberts, E. C., 40.  
 Consolidation under embankment-type loads. Shanker, N. B., Sarma, K. S., and Venkataratnam, M., 72.  
 Settlement analysis of the Gloucester test fill. Lo, K. Y., Bozozuk, M., and Law, K. T., 339.  
 Estimating settlements in dry sands during earthquakes. Finn, W. D. L. and Byrne, P. M., 355.  
 Winter earthwork: embankment construction using frozen soil. Alkire, B. D., Haas, W. M., and Botz, J. J., 364.  
 The effect of horizontal consolidation on differential settlements of footings on clay. Baker, R., 442.
04. *Bearing Capacity of Piles*  
 A design approach for pile foundations in permafrost. Nixon, J. F. and McRoberts, E. C., 40.  
 Testing of drivability of concrete piles and disturbance to sensitive clay. Fellenius, B. H. and Samson, L., 139.  
 Dynamic experiments with small pile foundations. Novak, M. and Grigg, R. F., 372.
05. *Earth Pressure Problems (incl. silos)*  
 Measurement of soil arching above a large diameter flexible culvert. Lefebvre, G., Laliberté, M., Lefebvre, L. M., Lafleur, J., and Fisher, C. L., 58.  
 Retaining walls anchorages and sheet piling. Theory and practice. Volume 1: Book Review. Byrne, P. M., 187.  
 Geotechnical design aspects for large gravity retaining structures under seismic loading. Thompson, C. D. and Emery, J. J., 231.

**06. Stability of Slopes, Cuts, and Excavations**

- Geotechnical aspects of coal waste embankments. Holubec, I., 27.  
 The use of one-dimensional compression tests and elastic theory in predicting deformations of rockfill embankments. Charles, J. A., 189.  
 Probability-based short term design of soil slopes. Tang, W. H., Yucemen, M. S., and Ang, A. H.-S., 201.  
 Seepage control in tailings dams. Mittal, H. K. and Morgenstern, N. R., 277.

**07. Seepage and Other Hydraulic Problems (incl. erosion)**

- Seepage control in tailings dams. Mittal, H. K. and Morgenstern, N. R., 277.

**08. Dynamic Problems**

- Geotechnical design aspects for large gravity retaining structures under seismic loading. Thompson, C. D. and Emery, J. J., 231.  
 Estimating settlements in dry sands during earthquakes. Finn, W. D. L. and Byrne, P. M., 355.  
 Dynamic experiments with small pile foundations. Novak, M. and Grigg, R. F., 372.

**09. Frost Action and Heat-transfer Problems**

- Steady-state and quasi-static thermal results for bare and insulated pipes in permafrost. Thornton, D. E., 161.

**F. Rock Properties: Laboratory and Field Determinations****00. General**

- Handbook on mechanical properties of rocks. Volume I—testing techniques and results: Book Review. Herget, G., 93.

**01. Classification and Identification**

- Investigations géomécaniques des emplacements de tunnels en rocher sur l'île de Montréal. Gill, D. E. et Ballivy, G., 481.

**05. Compressibility and Swelling**

- Frost heave and heaving pressure measurements in colliery shales. Kettle, R. J. and Williams, R. I. T., 127.  
 Performance of a high precision multipoint borehole extensometer in soft rock. Smith, P. D. K. and Burland, J. B., 172.

**06. Shear-deformation and Strength Properties**

- In situ* stress measurements in some near-surface rock formations—Thorold, Ontario. Palmer, J. H. L. and Lo, K. Y., 1.  
 Rock squeeze at Thorold Tunnel. Bowen, C. F. P., Hewson, F. I., Macdonald, D. H., and Tanner, R. G., 111.  
 Tunnels in bedded rock with high horizontal stresses. Lo, K. Y. and Morton, J. D., 216.  
 Friction and end bearing tests on bedrock for high capacity socket design. Rosenberg, P. and Journeaux, N. L., 324.

**G. Analysis of Rock-engineering Problems****02. Deformation Problems**

- Rock squeeze at Thorold Tunnel. Bowen, C. F. P., Hewson, F. I., Macdonald, D. H., and Tanner, R. G., 111.

**03. Bearing Capacity of Rocks**

- Friction and end bearing tests on bedrock for high capacity socket design. Rosenberg, P. and Journeaux, N. L., 324.

**04. Stability of Slopes, Excavations, and Openings**

- Major rock slides in the Rockies. Cruden, D. M., 8.  
 Tunnels in bedded rock with high horizontal stresses. Lo, K. Y. and Morton, J. D., 216.

**H. Design, Construction, and Behavior of Engineering Works****00. General**

- Predictions and observations on the behaviour of a warm gas pipeline on permafrost. Hwang, C. T., 452.

**01. Foundations of Structures**

- Mud Creek Bridge foundation movements. Bozozuk, M., 21.

Testing of drivability of concrete piles and disturbance to sensitive clay. Fellenius, B. H. and Samson, L., 139.

**04. *Earthworks, Embankments, Fills, and Dams***

Innovations in tailings disposal: Discussion. Highter, W. H. and Page, G. L., 334.

Settlement analysis of the Gloucester test fill. Lo, K. Y., Bozozuk, M., and Law, K. T., 339.

Winter earthwork: embankment construction using frozen soil. Alkire, B. D., Haas, W. M., and Botz, J. J., 364.

**05. *Underground Structures (incl. tunnels, conduits, and dams)***

Measurement of soil arching above a large diameter flexible culvert. Lefebvre, G., Laliberté, M., Lefebvre, L. M., Lafleur, J., and Fisher, C. L., 58.

Rock squeeze at Thorold Tunnel. Bowen, C. F. P., Hewson, F. I., Macdonald, D. H., and Tanner, R. G., 111.

Investigations géomécaniques des emplacements de tunnels en rocher sur l'île de Montréal. Gill, D. E. et Ballivy, G., 481.

**K. Construction Methods and Equipment**

**05. *Compaction***

Winter earthwork: embankment construction using frozen soil. Alkire, B. D., Haas, W. M., and Botz, J. J., 364.

**S. Snow and Ice Mechanics and Engineering**

**03. *Snow and Ice Engineering***

Ice bridges of the James Bay Project: Reply. Michel, B., 181.
